

Biography

Dr Adnene SAKLY
Senior Materials Analyst, Michelin
adnene.sakly@laposte.net

After an engineering degree in 2008 and a MSc degree in Mechanical Engineering in 2009 from ENIM (Tunisia), Adnene SAKLY was received his PhD in Materials and Process in 2013 from Nancy School of Mines (École des Mines de Nancy) (France). He is a specialist in Additive Manufacturing industrialization for aeronautical and automobile industries. For more than ten years, he led the development of new materials and process to propose high value-added solutions. He has participated in different European & French collaborative research programs aiming to develop new additive manufacturing materials and geometrically complex parts.
